

# BYOM & Multi-camera Solutions

**INOGENI**

Improve your meetings and webcasts with INOGENI products.

## TOGGLE

USB 3.0 switcher

- Switch between two USB 3.0 hosts
- Compatible with USB 2.0
- Automatic, manual or remote control

## 4KX-PLUS

UHD to USB 3.0 converter with HDMI loop & external power

- HDMI capture to USB 3.0
- Up to UHD 4K (3840/4096x2160) at 30 fps and 1080p at 60 fps
- HDMI audio support

## 4KXUSB3

UHD to USB 3.0 converter with HDMI loop

- Supports UHD 1440p, 1080p, 1080i, 720p, 480p, & 576p video formats
- Supports graphic formats
- Hardware-based colour space and sampling conversion

## SHARE2U

Dual input USB to USB AV converter with PiP

- Dual USB to USB 3.0 multi I/O capture
- Mix up to three sources
- Control interface: LAN, RS-232 & USB

## SHARE2

Dual input to USB AV converter with PiP

- Dual HDMI/DVI to USB 3.0 multi I/O capture
- Hardware mixer into a single USB 3.0 interface
- Control interface: LAN, RS-232 & USB

## CAM-300

HDMI/USB 2.0 camera selector with HDMI & USB 3.0 output

- Dual HDMI/DVI to USB 3.0 multi I/O capture
- Hardware mixer into a single USB 3.0 interface
- Control interface: LAN, RS-232 & USB

# Lecture Capture

**INOGENI**

INOGENI designs and manufactures products to enhance video conferencing with multiple video sources, using plug-and-play simplicity. Applications include video conferencing, lecture capture, medical imaging, virtual reality production, if fact anything that requires multiple video sources. INOGENI products enable better and more streamlined integration with all popular online platforms, including Zoom®, Teams®, webex®, vMix®, Facebook Live®, YouTube® and many more.

## 3GSDI to USB 3.0

### SDI2USB3

SDI2USB3 video converter enables 3G-SDI cameras to connect with computers, laptops or CODECs — without glitches or complicated setups. Converts SDI (video and audio) to USB 3.0 without compression. Active loop output connector.

## HDMI to USB 3.0

### HD2USB3

HD2USB3 converts 1080p HDMI (video and audio) to USB 3.0 without compression. It is the most reliable and convenient PC input to capture uncompressed video with audio from your camera's HDMI output for recording, editing, videoconferencing and streaming applications. The HD2USB3 is 4K upgradable 1080p60 HDMI to USB 3.0 converter.

## HDMI 4K to USB 3.0 capture card

### 4K2USB3

4K2USB3 converts 4K Ultra HD HDMI (video and audio) to USB 3.0 capture card (camera converter) without compression. It is compact in size and powered directly from a USB 3.0 port, making it a practical and easy-to-use USB 3.0 capture solution.
